Product Description

Ariens 48" Plow Blade Attachment

With 48" of thick steel, the Mammoth™ snow-plow scraper blade easily pushes away slush and snow. Using the Snowzilla™ attachment system, it only takes one person 30-seconds to connect and disconnect the blade from the tractor. It's controlled with an electric joystick on the dash for easy float and down-pressure, as well as to pivot 30-degrees left or right. Comes standard with a steel scraper edge.
